**Subject:** West St Warwick NY

Dear Sirs,

I was very encouraged to see the article regarding road repairs in a recent Warwick Advertiser.

I've lived at 57 West St in Warwick since March of 1992 and been lobbying my village government all that time to effectively enforce the speed limit.

Although the current 25 MPH is an improvement from 30 MPH neither has ever been observed by the bulk of traffic.

I have written to the village, spoken at meetings, suggested valid options, taken pictures, had articles in the paper and generally for 33 years advocated for effective enforcement.

I fully recognize and genuinely respect the limits of our police departments resources and manpower.

They sincerely do everything they can but a constant presence is impossible and without it the danger goes on unabated.

The street is narrow and officers conducting traffic stops are at risk from speeding or distracted drivers, to say nothing of the uncomfortable and possibly dangerous confrontations that can occur.

Mothers with carriages, the elderly, joggers, bicyclists, and pedestrians all are at risk every day.

Hundreds of students walk home every school day often in the street when no sidewalks exist or the sidewalks are hazardous in and of themselves.

We are the main route to the middle and high schools as well as a grammar school, fire house, and St Stephens Church and a busy martial arts gym.

There are 8 side streets that access the village or county one from West St.

West Street driveways verge on the street.

Like the rest of the state and country our population is aging and continuing to drive with slower reaction times than when we were younger.

New drivers going to and from school and during the summer generally don't have the awareness and benefit of experience that comes from years of driving.

Commercial traffic is constant and includes Chlorine Tankers that take on hazardous chemicals at Jones Chemical and traverse our neighborhood regularly.

I've suggested many times that the village reach out to the chamber of commerce, churches, bus garage, village and town employees, first responders (not actively responding), PTA, school board, lumber yards and local construction companies.

All these organizations and others would set an example and slow traffic but it will not happen without enforcement that includes all drivers.

The requests for have been ignored and rebuffed over the years and recently.

Its seems apparent that the political will to make this neighborhood street safe does not exist or that the thought of taking this on and solving it dismissed as ridiculous and or overwhelming.

There is a baffling lack of vision in finally addressing this situation here in Warwick.

On a recent trip to Oregon I was astounded at the level of compliance that drivers exhibited in busy densely populated Portland and particularly in Medford Oregon where traffic cameras are deployed.

Cameras are a constant presence and require no confrontation or risk to our police officers.

Cameras will pay for or significantly offset their own cost while creating the atmosphere we all desire in a village like Warwick.

Commercial traffic alone would yield significant income and or divert to county and state roads rather than traverse our residential neighborhood at speeds 20 and 30 miles above the limit.

Our roads would last longer with lower speed and lighter use and residents would quickly respond and comply with the speed limit.

I'm not suggesting speed traps just compliance with posted limits in recognition that we currently have the conditions that could create a death trap.

Speed kills.

Blessedly the only thing killed on West Street so far are dogs and cats and deer (heart breaking enough) but that can change literally at any moment.

Waiting to take action after a tragedy is deeply irresponsible and we've waited long enough.

Cameras work, no other measures have or will.

I'm requesting your assistance in motivating and assisting our local government to Make West Street Safe for everyone whatever that takes.

Will you help?

Subject: Village of Warwick – Well #3 Improvements

To Whom It May Concern,

TAM Enterprises, Inc. is formally requesting a time extension for work on the Village of Warwick, Well #3 Improvements project. TAM could not start work on site until after the Electrical Contractor scheduled for O & R to relocate poles and transformers. We were informed on February 3<sup>rd</sup> that this was completed, and our crew was on site that week.

In addition, there was also a substantial amount of time lost waiting for the decision on the change order for the insertion valve that was needed to be placed before the TAM crew could continue to work on site.

Given the four-month delay and the time taken for the change order, TAM would like to request an extension for a substantial completion date of December 31, 2025.

Please do not hesitate to reach out with any questions.

Thank you,

Justin Gove

Dependent on regional requirements our engines meet U.S. EPA Tier 4 Final and EU Stage V emission standards with a clean emission module designed to manage itself so you can concentrate on the task at hand or emit equivalent to U.S. EPA Tier 3 and EU Stage IIIA.

#### ENJOY ALL DAY COMFORT

- All new cab is spacious, quiet and comfortable with all around 360° visibility to keep you productive throughout the day. Seat-mounted controls feature a multifunction joystick for lift and tilt functions with an integrated thumb operated speed range, forward/neutral/reverse (FNR) switch, trigger operated differential lock and constant flow. Optional fourth function joystick also available.
- Digital display with soft touch buttons for customized settings to easily control linkage and drive train to further enhance operator comfort and safety.

#### EFFICIENTLY POWERFUL

- Cat C2.8 engine provides a cleaner, quieter operation while delivering superior performance and durability through a high torque, low speed design. Caterpillar's exclusive Intelligent Power Management system monitors operator input and available power to keep the machine working at peak efficiency.
- "Shift on the go" locking differentials and hydrostatic transmission provide smooth and powerful operation while increasing the efficiency of machine cycles. New Powertrain (Utility) Mode via the display enables right pedal machine operation giving further improved operator controllability of attachment RPM versus machine ground speed over creep control and inching pedal.

#### WORK MADE EASY

- All-in-one joystick to keep eyes on the work while maximizing operation of hydro-mechanical attachments with a state of the art pressure compensated electro-hydraulic system. Optimized Z-bar linkage for great performance and versatility with buckets that now have the DNA of the larger Cat loaders, such as curved side plates and a flat torque tube for parallel reference to the cutting edge.

#### CUSTOMIZE YOUR EXPERIENCE

- Work as one with your machine by customizing the controls. Operator can adjust machine responsiveness with the push of a button based on the attachment or application. Once customized, settings can be locked with "simplified mode" to ensure the machine is consistent and intuitive for every user.
- Machine security is enhanced with a standard keycode or optional Bluetooth<sup>®</sup> technology.

#### PURPOSE BUILT SPECIALITY MODELS

- Machines can be built to meet industry and application specific needs: Agriculture, General Construction, Industrial and Waste, Landscaping or Snow Removal.
- The 908 has the following specific handler arrangements:
  - Ag Handler
  - Waste Handler

## Engine

- The Cat® C2.8 engine meets U.S. EPA Tier 4 Final and EU Stage V emission standards.
- Cat diesel engines are required to use ULSD (ultra-low sulfur diesel fuel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:
  - ✓ 20% biodiesel FAME (fatty acid methyl ester)
  - ✓ 100% renewable diesel, HVO (hydrotreated vegetable oil) and GTL (gas-to-liquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or "Caterpillar Machine Fluids Recommendations" (SEBU6250) for details.

## Air Conditioning System

- The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 0.83 kg (1.8 lb) of refrigerant which has a CO<sub>2</sub> equivalent of 1.216 metric tonnes (1.34 tons).

## Paint

- Based on best available knowledge, the maximum allowable concentration, measured in parts per million (PPM), of the following heavy metals in paint are:
  - Barium < 0.01%
  - Cadmium < 0.01%
  - Chromium < 0.01%
  - Lead < 0.01%

## Sound Performance

## Recycling

- The materials included in machines are categorized as below with approximate weight percentage. Because of variations of product configurations, the following values in the table may vary.

Material Type	Weight Percentage
Steel	60.35%
Iron	16.88%
Nonferrous Metal	3.48%
Mixed Metal	1.05%
Mixed-Metal and Nonmetal	0.91%
Plastic	2.24%
Rubber	4.25%
Mixed Nonmetallic	0.04%
Fluid	3.35%
Other	3.72%
Uncategorized	3.71%
Total	100.00%

- A machine with higher recyclability rate will ensure more efficient usage of valuable natural resources and enhance End-of-Life value of the product. According to ISO 16714 (Earthmoving machinery – Recyclability and recoverability – Terminology and calculation method), recyclability rate is defined as percentage by mass (mass fraction in percent) of the new machine potentially able to be recycled, reused, or both.

All parts in the bill of material are first evaluated by component type based on a list of components defined by the ISO 16714 and Japan CEMA (Construction Equipment Manufacturers Association) standards. Remaining parts are further evaluated for recyclability based on material type.

Because of variations of product configurations, the following value in the table may vary.

Recyclability – 93%

**Subject:** Warwick Village Court's 2024-25 JCAP Reconciliation

Good Afternoon,

Thank you for Warwick Village Court's submission of the 2024-25 JCAP Reconciliation Report and supporting documentation. We are not able to close this grant for the Court as the invoice from Professional Painting Services shows a balance due. For auditing purposes, please submit a canceled check paired with an invoice, paid receipt, voucher/invoice noted with a check number and date paid, or invoice reflecting zero balance due.

Reviewing the documentation provided, we came up with the following:

The Court was awarded \$1,931.00 for repairs/paint for the Court, funds were spent accordingly

The Court was awarded \$524.26 to purchase chairs (2 at \$262.13 each) and the receipt indicates \$475.78 was spent, leaving an unspent balance to be returned in the amount of **\$48.48.**

The Court was awarded \$249.99 to purchase a file cabinet and the receipt indicates \$241.58 was spent, leaving an unspent balance to be returned in the amount of **\$8.41.**

Total Unspent Balance to be Returned: **\$56.89**

Please have your municipality return the unspent funds in the amount of **\$56.89**, payable to the Commissioner of Taxation and Finance, to the Division of Grants, Contracts & Procurement, Attn: JCAP, 2500 Pond View, Suite 104, Castleton-on-Hudson, NY 12033.

If the Court has any questions on the return of funds or amount spent accordingly, feel free to email me.

Sincerely,

Alina

I have examined the books and records of the Village of Warwick – Justice Court as of May 31, 2023 in order to provide an internal audit to comply with section 2019-a of the Uniform Justice Court Act.

The annual audit checklist is enclosed with this report.

I have found that all reporting and record keeping is being completed in a timely manner and the reports are in compliance with New York State requirements. There were no major record keeping deficiencies discovered in this fiscal year.
