Attn: Members of the Village of Warwick Architectural & Historical Review Board

The following documents and materials are representative of the proposed historically inspired residence at 30 Brady Rd in the Village of Warwick.

The intention with this project is to demolish the existing single family home in disrepair and construct a larger cohesive structure with four two-bedroom dwelling units. The design intent and visual narrative are intended to be that of a single-family home that has evolved over time in the Village, like many such structures throughout.

The visual “journey through time” starts from right to left, and from ground level upward.

The right pulls queues from traditional Warwick farmhouses with traditional detailing, which would have been constructed next to the ruins of an old barn or stone wall. The next elements are the center and left side forms. The center portion containing the stone elements is reminiscent of structures throughout the village that were either originally constructed with stacked stone or which utilized stone through repurposing barn foundations. The left side is a logical “traditional end-cap” to this center portion. These additional elements create a balance of a large center mass with a historic base and historical detailing and trimwork above, flanked by two less ornate forms but with complementary presence.

The interplay of materials, textures, colors, and forms curate a visually striking compositional palette that looks at home in the village.

Sincerely,

Christopher JP Collins, R.A. LEED^{AP}
